

GreenBrite® Dual Slope Rotary Laser Kit

Model #: JRT300-GNHV-K

UPC:

Elevate your job site precision with our advanced GreenBrite® Rotary Laser, designed to meet the demands of your interior applications. The green beam, an impressive 400% more visible than red, ensures unparalleled visibility. With a 4000-foot range, this laser level provides maximum coverage for your job site. Built tough with an IP67 rating, it can withstand the harshest environments, offering durability in challenging conditions. The impact resistance of up to 6 feet protects against tips and drops, ensuring longevity on the jobsite. With five rotational speeds, a 400-foot remote range, and a detector (bracket not included) for one person operation, this laser level maximizes efficiency. The electronically-controlled dual slope operation allows you to perform slopes up to 5 degrees in both the x and y axis, catering to versatile job site requirements. The lithium-ion rechargeable batteries boast an impressive 21+ hours of runtime, keeping you powered throughout the day. With four angle scan modes and visual and audible alarms, this laser level is your ultimate companion for precision and safety.

PRODUCT DETAILS

JRT300-GNHV-K Includes > Laser, 2 Li-ion batteries & USB-C charger, 2 alkaline battery compartments (batteries not included), magnetic target, remote control with 2 "AAA" alkaline batteries, detector with 2 "AAA" alkaline batteries (bracket not included), track mount, and hard-shell carrying case

- Green beam is 400% more visible than red beam, perfect for interior applications
- 4000' range provides maximum jobsite coverage
- IP67 rated to protect against the harshest jobsite environments
- Impact resistant to 6' (2m) protecting against tips and drops
- Five rotational speeds: 0, 100, 300, 600 & 1200 RPM
- 400' remote range and detector for one person operation
- Electronically-controlled dual slope operation allows user to perform slope up to 5 degrees in both x and y axis
- Lithium-ion rechargeable batteries last up to 21+ hours for all day runtime
- 4 Angle Scan Modes (0°, 15°, 30°, 60°)
- Robust track clip for simple, secure ceiling and wall mounting

SPECIFICATIONS

Accuracy	+1/16"/100' horizontal; +1/8"/100' vertical or +1.5mm/30m horizontal; 3mm/30m vertical
Battery Life	21 hours
Exterior Range	Up to 4,000' diameter with detector (bracket not included)
Grade Setting	±8%
Interior Range	Up to 350'
IP Protection Class	IP67
Laser Classification	Class 3R
Laser Wavelength	510-530nm (Green)
Leveling Method	Automatic (Electronic)
Maximum Power Output	≤5mW
Remote Range	400'
Rotation Speeds	0, 100, 300, 600, 1200 RPM
Scanning Modes	0,15,30,60
Self-Leveling Range	±5°
Slope	±5° Dual
Tripod Thread	5/8"-11
Warranty	5 Year Warranty
Working Range	Up to 350'
Working Range Angle	360°
Working Temperature	14°F to 113°F

APPLICATION

Johnson's JRT300-GNHV-K GreenBrite® rotary laser kit is ideal for layout work including drop ceilings, wainscoting, framing, track, electrical, plumbing and more.
