## Safety Works®

Safety Works® was founded in 1998. Since then we've built longstanding and trusted relationships with leading retailers and wholesalers in the retail-focused DIY and contractor market, as well as lawn and garden centers. Our success has been in providing customers with products that are priced right, performance tested, and packaged to enhance the shopping experience and sales. It's all we do, so we're best positioned to assist retail professionals in selecting the best products for specific market needs.

## The Dirt On Our Gloves

All of our gloves are handcrafted with the finest materials. Our materials work together to form functional work gloves that allow you to perform the task at peak levels.

Safety Works is proud to bring four proven and trusted brands to the lawn and garden market:

Legacy brand of gloves from leather gloves to seamless knits

Garden gloves of genuine quality and artisan styled

High Performance work gloves made from recycled materials

Gloves specifically designed for automotive work

# Glove Information Shells

## Leather

### Deerskin:

Soft supple leather that feels great. It provides good durability and abrasion resistance while offering premium dexterity for a leather glove.

### Goatskin:

Smooth, durable leather with great tactile sensitivity and superior durability in high abrasion applications. Does not stiffen after becoming wet.

### Pigskin:

Breathable general use leather that gets softer the more the glove is used. Does not stiffen after becoming wet.

### Cowhide:

Long lasting leather with great gripping ability. Split Cowhide offers premium durability and abrasion resistance but fair dexterity.

### Synthetic:

Soft, durable and tear resistant with high tensile strength.

## Fiber

### Bamboo:

A fiber that can be knitted or woven to be soft and flexible while providing enhanced breathability, moisture wicking properties and UV protection.

### Nylon:

Synthetic fiber that provides excellent durability, comfort and dexterity.

### Polyester:

Synthetic fiber that provides good durability, superior comfort and dexterity.

### Cotton:

Natural fiber that provides reliable comfort and economical performance.

### Elastane Fiber Spandex/Lycra:

Synthetic fiber that is used in a blend to increase elasticity, strength and durability.

### West County Recycled Back:

Each West County glove that is made with our proprietary recycled blend is made using up to 2 recycled 8oz water bottles.

TYPES OF LEATHER	DURABILITY/ABRASION RESISTANCE	DEXTERITY
SPLIT COWHIDE	Excellent	Fair
GRAIN COWHIDE	Very Good	Good
GOATSKIN	Good	Excellent
DEERSKIN	Good	Excellent
PIGSKIN	Excellent	Very Good
SYNTHETIC	Excellent	Excellent

# Glove Information

# Coatings

## Nitrile

A thicker coating that provides excellent dry grip, as well as superior resistance to snag, cut, puncture, and abrasion. When engineered into a foam coating, it offers a very good grip in oily conditions.

## Latex

Offers good grip in dry and wet conditions. Textured grips such as crinkle, enhance the gloves' grip in wet conditions. It is not recommended for oily conditions. It also provides resistance to snag, cut, puncture and abrasion.

## Polyurethane

Provides good abrasion resistance, as well as good dry grip and a fair grip in slightly wet and oily conditions. Its properties allow for a very thin coating which results in excellent tactility and dexterity.

## NeoFoam®

Proprietary coating provides good grip in dry, wet or oily surfaces. Offers great breathability and durability. Neofoam® coating is touch screen compatible.
